

React - Applying Redux

Date _____
Page _____

(ii)

What is Redux?

- Redux allows you to manage your app state in a single place and keep changes in your app more predictable and traceable, making it easier to understand the changes happening in your app.

(iii)

What is Redux Thunk used for?

- Redux Thunk middleware allowing you to write action creators that return a function instead of an action.

(iv)

What is Fiber Component, when to use Fiber Component over Component?

- It is the type of Component which re-renders only when the props passed to it changes and not even if its Parent Component re-renders or if the shouldComponentUpdate() method is called.

(v)

What is the second argument that can optionally be passed to setState and what is its purpose?

- The Second Parameter to setState() is an optional callback function that will be executed once setState is completed and the component is re-rendered.
